Product name: APP W900 WB Silikonentferner

An environmentally-friendly, water-based cleaning and degreasing agent with a very low content of organic solvents (VOC < 20%). Provides the water-thinned products being applied with optimal adhesion. The product prevents the formation of silicone craters while painting.

Container: 5.0 l.

Product and additives: APP W900 WB Silikonentferner.

Colour: Transparent, colourless.

Usage: The product is intended for removing impurities including silicone, teflon, oils and greases from surfaces to be lacquered with water-thinned base lacquers.

Base

Proper base types: Plastics, old lacquer coats, primers, base paints, and filling coats before applying finish coating.

Application

Soak a cleaning cloth in the remover and apply the liquid onto the surface being degreased. Immediately after applying, wipe the surface dry with another clean piece of absorbant cleaning cloth.

Use compressed air to blow away moisture from the grooves, edges, and other not easily accessible areas.

Caution!

Frequent and regular replacement of the cleaning cloth is necessary.

If needed, keep repeating this operation until the impurities are completely removed.

Applying:

The product is to be applied with a paintbrush, brush, cotton or cellulose cleaning cloth, sponge, or by spraying.

It is recommended to employ hand-operated atomizers resistant to removers in order to reduce the amount of remover being used.

Drying:

Do not allow the remover to evaporate from the surface being degreased. Use compressed air to blow away moisture from the grooves, edges, and other not easily accessible areas.

The above information complies with current knowledge on our products and their possible applications.

This guarantees no specific properties or usability in particular conditions. Users should observe guidelines and warnings provided on product labels and specified in material safety data sheets. We hold no responsibility if conditions beyond our control affect the final result of work.
