## • Soundproof mat with felt

### APP Nr 050907

The soundproof mat with felt is a product characteristic for high ability of reduction of unwanted noises due to the implementation of bituminous layer and an additional layer of felt. The total thickness of the mat amounts to 10 mm.

#### Advantages:

- high reduction of vibrations and trembling
- increasing the stiffness of big pieces of sheet metal
- high reduction of noise
- improving the acoustic space inside the car

#### Usage:

The APP soundproof mat with felt is perfect for reducing noises coming into the interior of the car by the floor, the boot, the back inner wheel arches and the partition separating the cabin from the chamber of the engine.

#### Other usage:

- household equipment
- vehicles and machines used in agriculture
- building industry
