## ■ Pneumatic Angle Mini Sander TE 21L No. APP 131100

Extremely easy to handle angle pneumatic mini sander purposed for cutting and sharpening. Ideal for most demanding working conditions where precision is required. Powerful motor and light weight enables efficient treatment of surface.

### Features:

- Designed for discs of 50 mm maximum diameter (NTS No.619P01.046-working disc d50 Velcro).
- Special construction enables to obtain higher pressure and maximum visibility of treated elements.
- Speed control valve
- Compact design and little weight allow to operate in areas of difficult access and ensures work comfort.
- Dust extraction system eliminates pollution of place work with dust
- Working head under angle of 90°.

### TECHNICAL DATA:

APP NO.	131100
Max Air Consumption	330 l/min
Working Pressure	6 bar
Speed Adjustment	YES
Vibration Frequency	18 000 (RPM)
Weight	0.55 kg
Disc	50 mm
Compression Fitting	Ø 6 mm

## ■ Pneumatic Mini Sander LD 30 No. APP 131110

Efficient pneumatic Mini Sander of very high technical parameters. Perfect for removal of contaminants of top coat, small repairs and scratches. Ideal for precise clearing of edges and sides and operation in places of difficult access.

### Features:

- Designed for 37 mm pads supported with Velcro (APP No. 40 MXR) and glue type (APP No. 40 MX),
- Perfect balance ensures minimum vibrations
- Speed regulator provides precise control and fast adjustment of revolutions depending on treated surface.
- Standard lock of working disc
- Dust extraction system eliminates pollution of work place with dust.
- Working head under angle of 90°.

### TECHNICAL DATA:

APP NO.	131110
Max Air Consumption	330 l/min
Working Pressure	6 bar
Speed Adjustment	YES
Vibration Frequency	7500 (RPM)
Orbit	1.5 mm
Weight	0.625 g
Noise	89 dB (A)
Working Disc	6 mm

## ■ Mini Orbital Sander LH75 No. APP 131200

Top quality pneumatic Mini Sander. Powerful, handy and light tool for polishing of small and vertical surfaces and operation in places of difficult access as well as small repairs of top coat. Latest generation structure along with an ergonomic handle enable firm grip and perfect handling.

### Features:

- Designed for 75 mm sponges (APP No. 8080005, 8080010, 8080015, 8080020).
- Perfect for polishing of vertical surfaces, places of limited access, small repairs of top coat as well as small surfaces.
- Ergonomic design and little weight provides excellent work comfort.
- Optimum balance ensures minimum vibrations.
- Speed regulator provides precise control and fast adjustment of revolutions depending on treated surface.
- Ergonomic body reduces hand fatigue with evenly distributed weight.

### TECHNICAL DATA:

APP NO.	131200
Max Air Consumption	500 l/min
Working Pressure	6 bar
Speed Adjustment	YES
Vibration Frequency	4000 (RPM)
Orbit	1.5 mm
Weight	1 kg
Noise	76.8 dB (A)
Fitting disc	75 mm Velcro
