• Spray Gun LPH400 LV

APP No. 160382 / 160383

Low pressure IWATA LPH400 LV spray gun is purposed for spraying traditional and water-diluted basecoats and application of other decorative finish coatings.

IWATA technology offers a spray gun that creates extremely fine atomization with LV4 head working pressure of below 0.7 bar and low air consumption of 270 l/min.

Special spray assembly (nozzle and head) employs a patented system that ensures double high atomization spray. This solution ensures flawless clear coats, even coverage and silky smooth, highly atomized finish of metallic and pearl top coats, as well as high work efficiency.

Double high atomization spray patented system

APP No.	Model	Nozzle (mm)	Head Type	Pressure (bar)	Spray (ml/min)	Air Consumption (l/min)	Spray Width (mm)	Body Weight (g)
